SOFTWARE PROJECTS

- **AppPraiseMe (React/Ruby on Rails/PostgreSQL)**
  - Enterprise level tool for managers to complete and track employee appraisals and notes. This data driven tool is meant to assist people managers.

- **Star Wars Galacticpedia (JavaScript/Jquery)**
  - One page application utilizing an existing open source API call to gather and render Star Wars characters by movie.

- **TravelToo (JS/Express/Node/ MongoDB)**
  - Collaborative project done with 2 classmates across 3 time zones demonstrating the MVC model where users are able to review trips they have previously gone on.

- **WerqOut (React/Express/Node/ Mongo)**
  - A React application that gives users an opportunity to log in and share their favorite exercises into a community gym for other users to view.
